

7. Concluding Remarks

The overall impression of the Review Team is that the Department of Statistics cannot be commended too highly. Athens University of Economics and Business should be congratulated for allowing its Department of Statistics to set its own high standards. The Review Team expresses the sincere hope that other Departments in the University and at other Greek Universities will reach a comparable level of quality. The impartial evaluation of an external commission is an initiative that can only be recommended to other similar institutions.

The Assessment Committee

C.R. Rao (Chairman)
Professor, Penn State University
USA

P. Florides
Professor, Trinity College
University of Dublin, Ireland

J. Teugels
Professor, University of Leuven
Belgium

W. Urfer
Professor, University of Dortmund
Germany
