

6. Student Welfare and Recreational Facilities

The Review Team has been informed about the amelioration of the medical services at the *Health Centre* of the University. On the other hand, it was amazed at the complete absence of sporting facilities for staff and students. The University should consider it a prime policy to provide such a service to all of its students and employees.

The University needs also to look seriously into the possibility of providing adequate and good quality *accommodation* to its student body. The overall quality of such accommodation depends directly on the quality and abundance of the possibilities that the University can offer itself to its students.
